

# Package ‘QueryLibrary’

November 7, 2018

**Type** Package

**Title** A Query Library for the OMOP-CDM

**Version** 0.0.1

**Date** 2018-11-03

**Maintainer** Peter Rijnbeek <p.rijnbeek@erasmusmc.nl>

**Description** This is an R package that implements a library of standard queries that run against the OMOP-CDM. The purpose of the library is to help new users to learn how to query the CDM. The queries in the library have been approved by the OHDSI community. The query library will be mainly used for training purposes, but will also be a valuable resource for the experienced users.

**License** Apache License 2.0

**VignetteBuilder** knitr

**URL** <https://github.com/OHDSI/QueryLibrary>

**BugReports** <https://github.com/OHDSI/QueryLibrary/issues>

**Imports** dplyr

**Suggests** knitr,  
rmarkdown,  
shiny,  
shinydashboard,  
shinyFiles,  
shinyjs

**LazyData** false

**RoxygenNote** 6.1.0

**Encoding** UTF-8

## R topics documented:

launchSqlLibrary . . . . .	2

---

`launchSqlLibrary`*Launch the SqlRender Developer Shiny app*

---

**Description**

Launch the SqlRender Developer Shiny app

**Usage**

```
launchSqlLibrary(launch.browser = TRUE)
```

**Arguments**

`launch.browser` Should the app be launched in your default browser, or in a Shiny window. Note: copying to clipboard will not work in a Shiny window.

**Details**

Launches a Shiny app that allows the user to develop SQL and see how it translates to the supported dialects.
